

# Update on CP-TT

**Chris Harris**

OPST-4 17 June 2021

- CP-TT has been largely dormant over the last few years
  - Due to limited resource and uncertainty over role/scope
- A meeting was held in May with the OceanPredict co-chairs to discuss the way forward
- Agreed to seek some ‘interim’ co-chairs to spend some time defining the task team scope and building a community around it
  - Santha Akella and Kristian Mogensen have agreed to be part of this activity
  - Given coupled interests of both DA-TT (coupled DA) and COSS-TT (regional coupled systems) future TT may well have more of a global/large-scale coupled **modelling** focus
  - Ideally will involve others outside the existing OceanPredict community
- Will be looking to consult and engage with OPST members over next few months
