

NOAA National Ocean Service Storm Surge Modeling

Saeed Moghimi, Greg Seroka, Panagiotis Velissariou, Soroosh Mani, Yuji Funakoshi, Georgios Britzolakis, Zizang Yang, Bahram Khazaei, Fariborz Daneshvar, Edward Myers

NOS Storm Surge Modeling Team

*Coastal Marine Modeling Branch, Coast Survey Development Laboratory,
Office of Coast Survey, National Ocean Service*

Global Surge and Tide Operational Forecast System

COSS-TT
May 2023

End users and stakeholders

- **Storm surge forecasters**, e.g.
 - NOAA Weather Forecast Offices (WFOs) to generate flood forecasts during winter storms
 - NOAA Ocean Prediction Center (OPC) for operational extratropical coastal storm surge forecasts

- **Mariners**, e.g.
 - Pilots of ships to navigate into ports safely and efficiently based on tide, current forecasts

Coastal Flood Statement

Coastal Hazard Message
National Weather Service Boston/Norton MA
1239 PM EST Fri Dec 18 2020

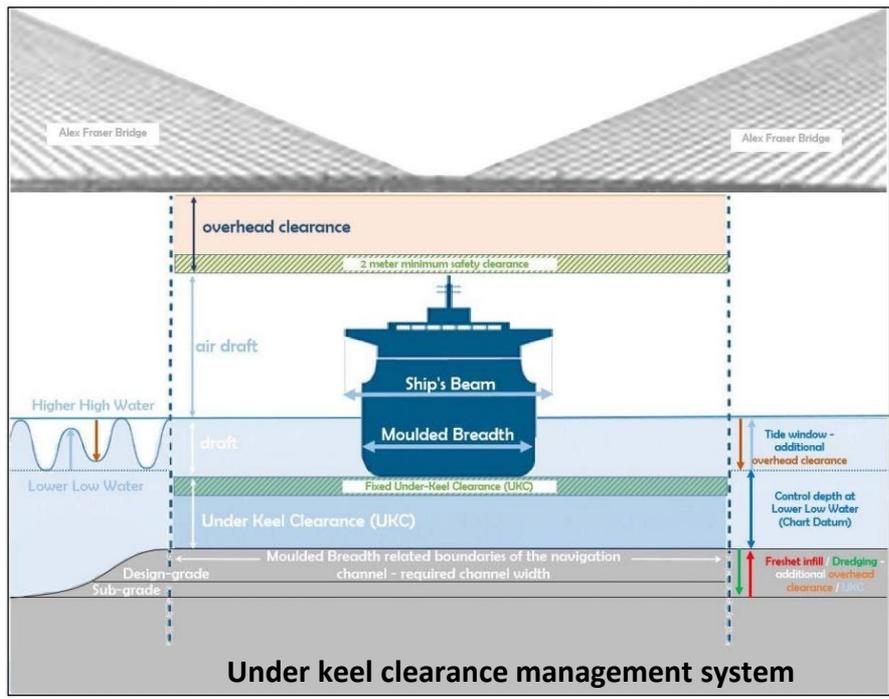

MAZ024-182200-
/O.NEW.KBOX.CF.S.0015.201218T1800Z-201218T2200Z/
Nantucket MA-
1239 PM EST Fri Dec 18 2020

- * WHAT...1 foot or less of inundation above ground level expected in low-lying areas near shorelines and tidal waterways (4.6 to 5.1 feet Mean Lower Low Water).
- * WHERE...Nantucket MA County.
- * WHEN...Until 5 PM EST this afternoon.
- * IMPACTS...Some water on low lying roads and property.

PRECAUTIONARY/PREPAREDNESS ACTIONS...

Do not drive through flooded roadways.

NOAA Coastal Flood Statement

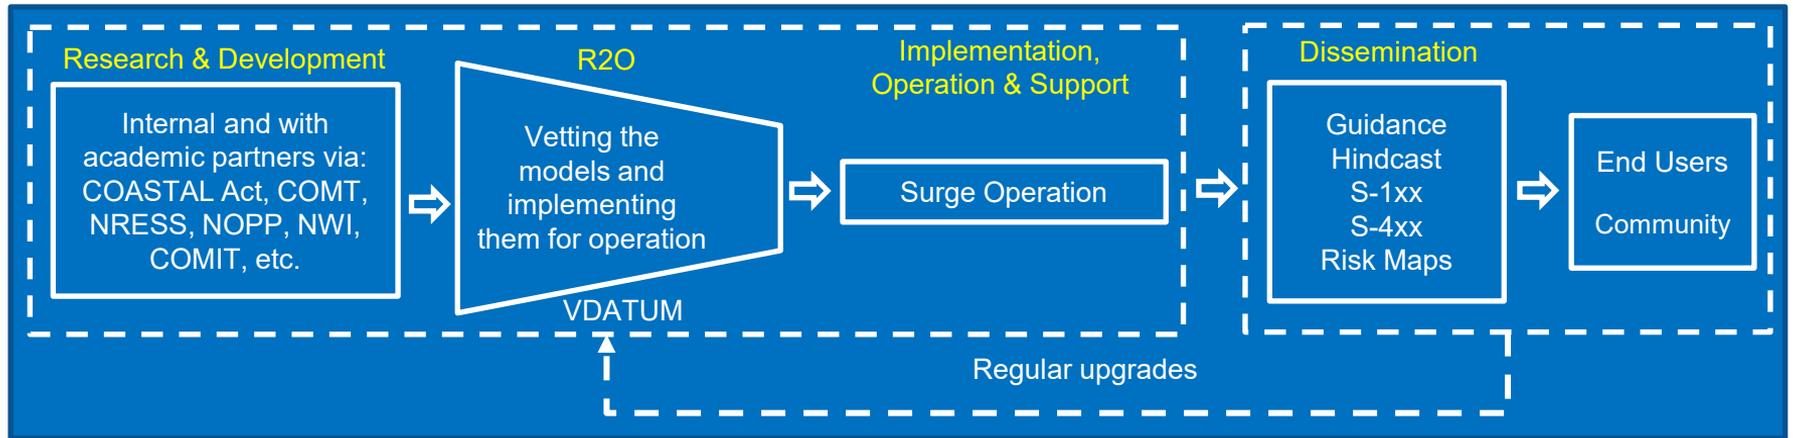

Under keel clearance management system

Our workflow

Planning, research, development, operation and maintenance of the NOAA National Ocean Service storm surge modeling portfolio including:

- Research and development;
- Research-to-operation (R2O);
- Operational implementation and support;
- Regular upgrades and maintenance;
- Dissemination

NOS Storm Surge Modeling Team

Products and services

Operational

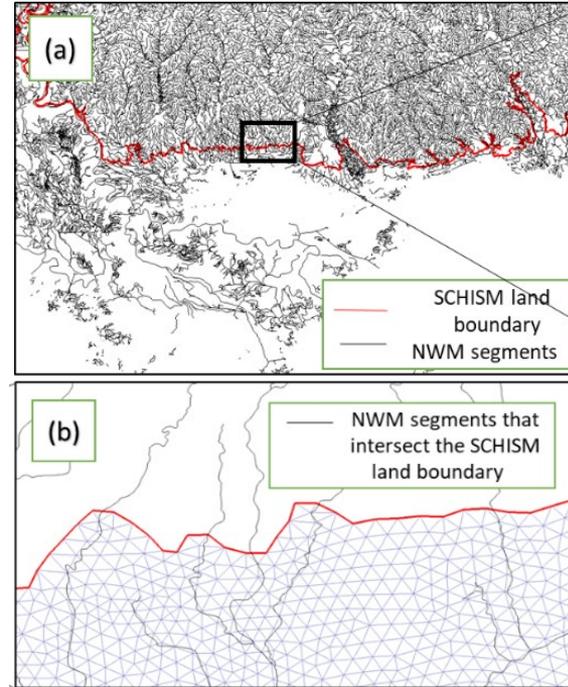

- **Surge & Tide Operational Forecast System (STOFS)**
 - Two-dimensional global (**STOFS-2D-Global**)
 - Three-dimensional coastal storm surge including inland hydrology extremes (**STOFS-3D-Atlantic**)

Pre-Operational

- **Surge & Tide Operational Forecast System**
 - Three-Dimensional Guidance System for Pacific Ocean in 2023 (**STOFS-3D-Pacific**)

Research and development

- Hurricane Storm Surge On-Demand (Cloud / HPC)
- Automated on-demand unstructured mesh generation ([OCSSMesh](#))
- Coastal Ocean Model Coupling Application ([CoastalApp](#))
- Sensitivity of the coastal ocean to bathymetry

The three-Dimensional Coastal storm surge including inland hydrology extremes (**STOFS-3D-Atlantic**). Part of model domain in the **Lower Mississippi** region. a) and b) overlaying of river network on model mesh. Red line is the 10m topography contour.

Surge & Tide Operational Forecast System (STOFS)

View output:
nowcast.noaa.gov
<https://polar.ncep.noaa.gov/estofs/>
cera.coastalrisk.live

Model engine: SCHISM

- Driven by **GFS, HRRR** (Atm + precip) and **NWM**
- 1 cycle/day; 24 hr nowcast, **2 day forecast water levels, currents, temperature and salinity**
- **Grid resolution:** ~2-7 km in ocean; 50-200 m in main channels; down to <10 m in small streams & levees

<https://registry.opendata.aws/noaa-nos-stofs3d/>

STOFS-3D-Atlantic

In partnership with **Virginia Institute of Marine Science**

Model engine: ADCIRC

- Driven by **GFS**
- 4 cycles/day; 6 hour nowcast, **7.5 day forecast water levels: tides, surge, combination**
- **Grid resolution:** coastal resolution at least 1.5 km globally, up to ~30-120 m for US coasts, AK, HI

<https://registry.opendata.aws/noaa-gestofs/>

STOFS-2D-Global

In partnership with **University of Notre Dame**

NOS Storm Surge Modeling Team

Products and services

Operational

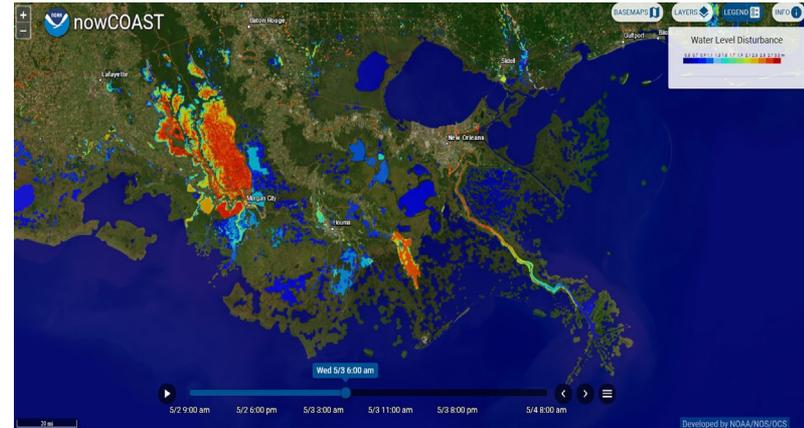

- **Surge & Tide Operational Forecast System (STOFS)**
 - Two-dimensional global (*STOFS-2D-Global*)
 - Three-dimensional coastal storm surge including inland hydrology extremes (*STOFS-3D-Atlantic*)

Pre-Operational

- **Surge & Tide Operational Forecast System**
 - Three-Dimensional Guidance System for Pacific Ocean by early 2023 (*STOFS-3D-Pacific*)

Research and development

- Enhancing Northern Pacific Ocean Modeling
- COASTAL Act: Named Storm Event Model
- Hurricane Storm Surge On-Demand
- Automated on-demand unstructured mesh generation (OCSMesh)

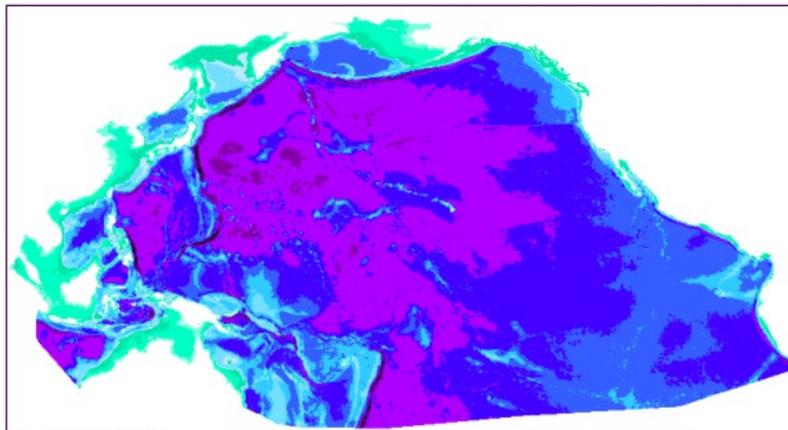

NowCoast visualization of the three-Dimensional Coastal storm surge including inland hydrology extremes (*STOFS-3D-Atlantic*) – Lower Mississippi region

STOFS-3D-Pacific in development

The goal is to obtain **extended coverage** and **improved skill**, both at basin-scale and along the US coast and estuaries. Anchoring the modeling is high-resolution implementation of the unstructured-grid code **SCHISM**, to allow for **3D modeling** and support **S-111** surface current model forecast guidance.

Products and services

Operational

- **Surge & Tide Operational Forecast System (STOFS)**
 - Two-dimensional global (*STOFS-2D-Global*)
 - Three-dimensional coastal storm surge including inland hydrology extremes (*STOFS-3D-Atlantic*)

Pre-Operational

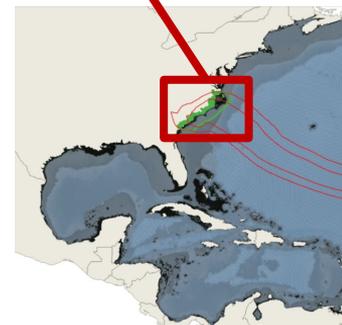

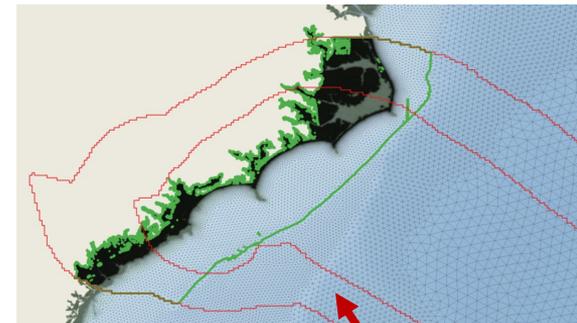

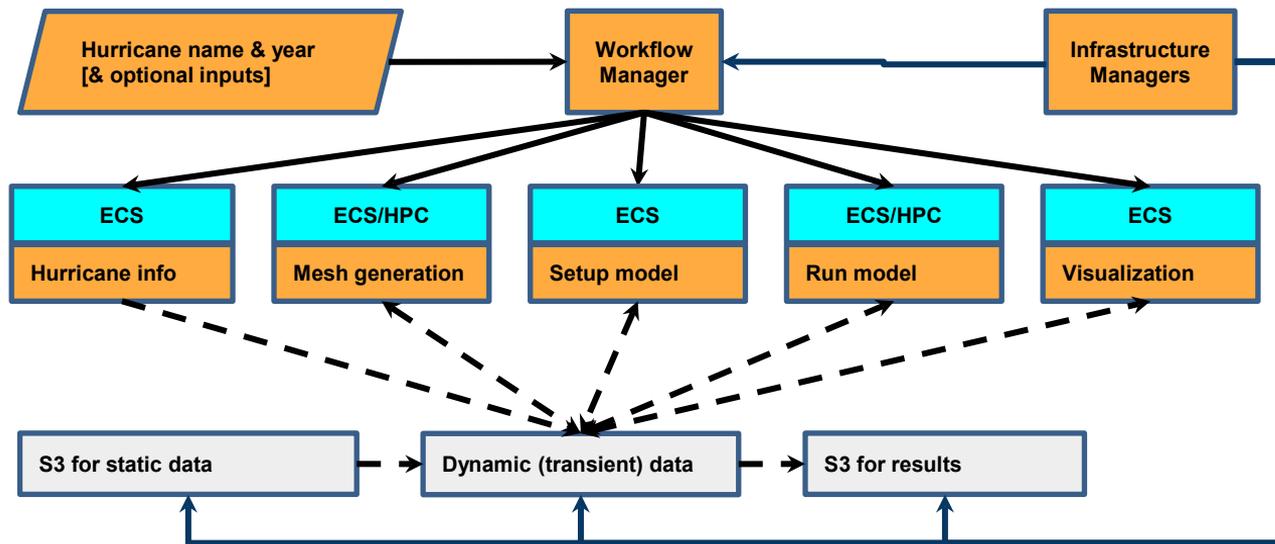

- **Surge & Tide Operational Forecast System**
 - Three-Dimensional Guidance System for Pacific Ocean in 2023 (*STOFS-3D-Pacific*)

Research and development

- Coastal Ocean Model Coupling Application (CoastalApp)
- Hurricane Storm Surge On-Demand (Cloud / HPC)
- Automated on-demand unstructured mesh generation (OCSSh)
- Sensitivity of the coastal ocean to bathymetry

Hurricane Surge On-Demand – Cloud / HPC implementation

Provisioning, Workflow and Data Access

Florence 2018

- Wind swatch contours are in red
- Impacted area in green

Workshops and community engagement

- UN Global Geospatial Information Management (UN-GGIM) workshop Kiribati, Tarawa (Nov 2022)
- Integrated Marine Geospatial Information Management held in conjunction with the launch of the **Joint IHO-Singapore Innovation and Technology Laboratory** (October 2021)
- International workshop (building capacity effort) under the IHO South West Pacific Hydrographic Commission (SWPHC) for educating **Pacific Island communities** on navigation products & services that NOAA provides (Sep 2021)
- Workshop for the **Coast Survey Navigation Managers and the Navigation Response Teams** on how to use the model products (Summer 2021)
- Planned NOAA National Weather Service trainings for **Weather Forecast Offices (WFOs)** along the Atlantic
- Organizing a “**Coastal Ocean Modeling in Support of Marine Navigation and the Blue Economy**” session at AGU and AMS

It takes a village to raise a child ...

Current Status:

- 14 tests are implemented (from component level to **atm-> ocn <-> wav**)
- Executed on Hera-RDHPCS
- Are being tested on other infrastructures (in Germany and academic partners)
- Tests for FVCOM and SCHISM are to be included
