Users may vacillate...

# Motivation

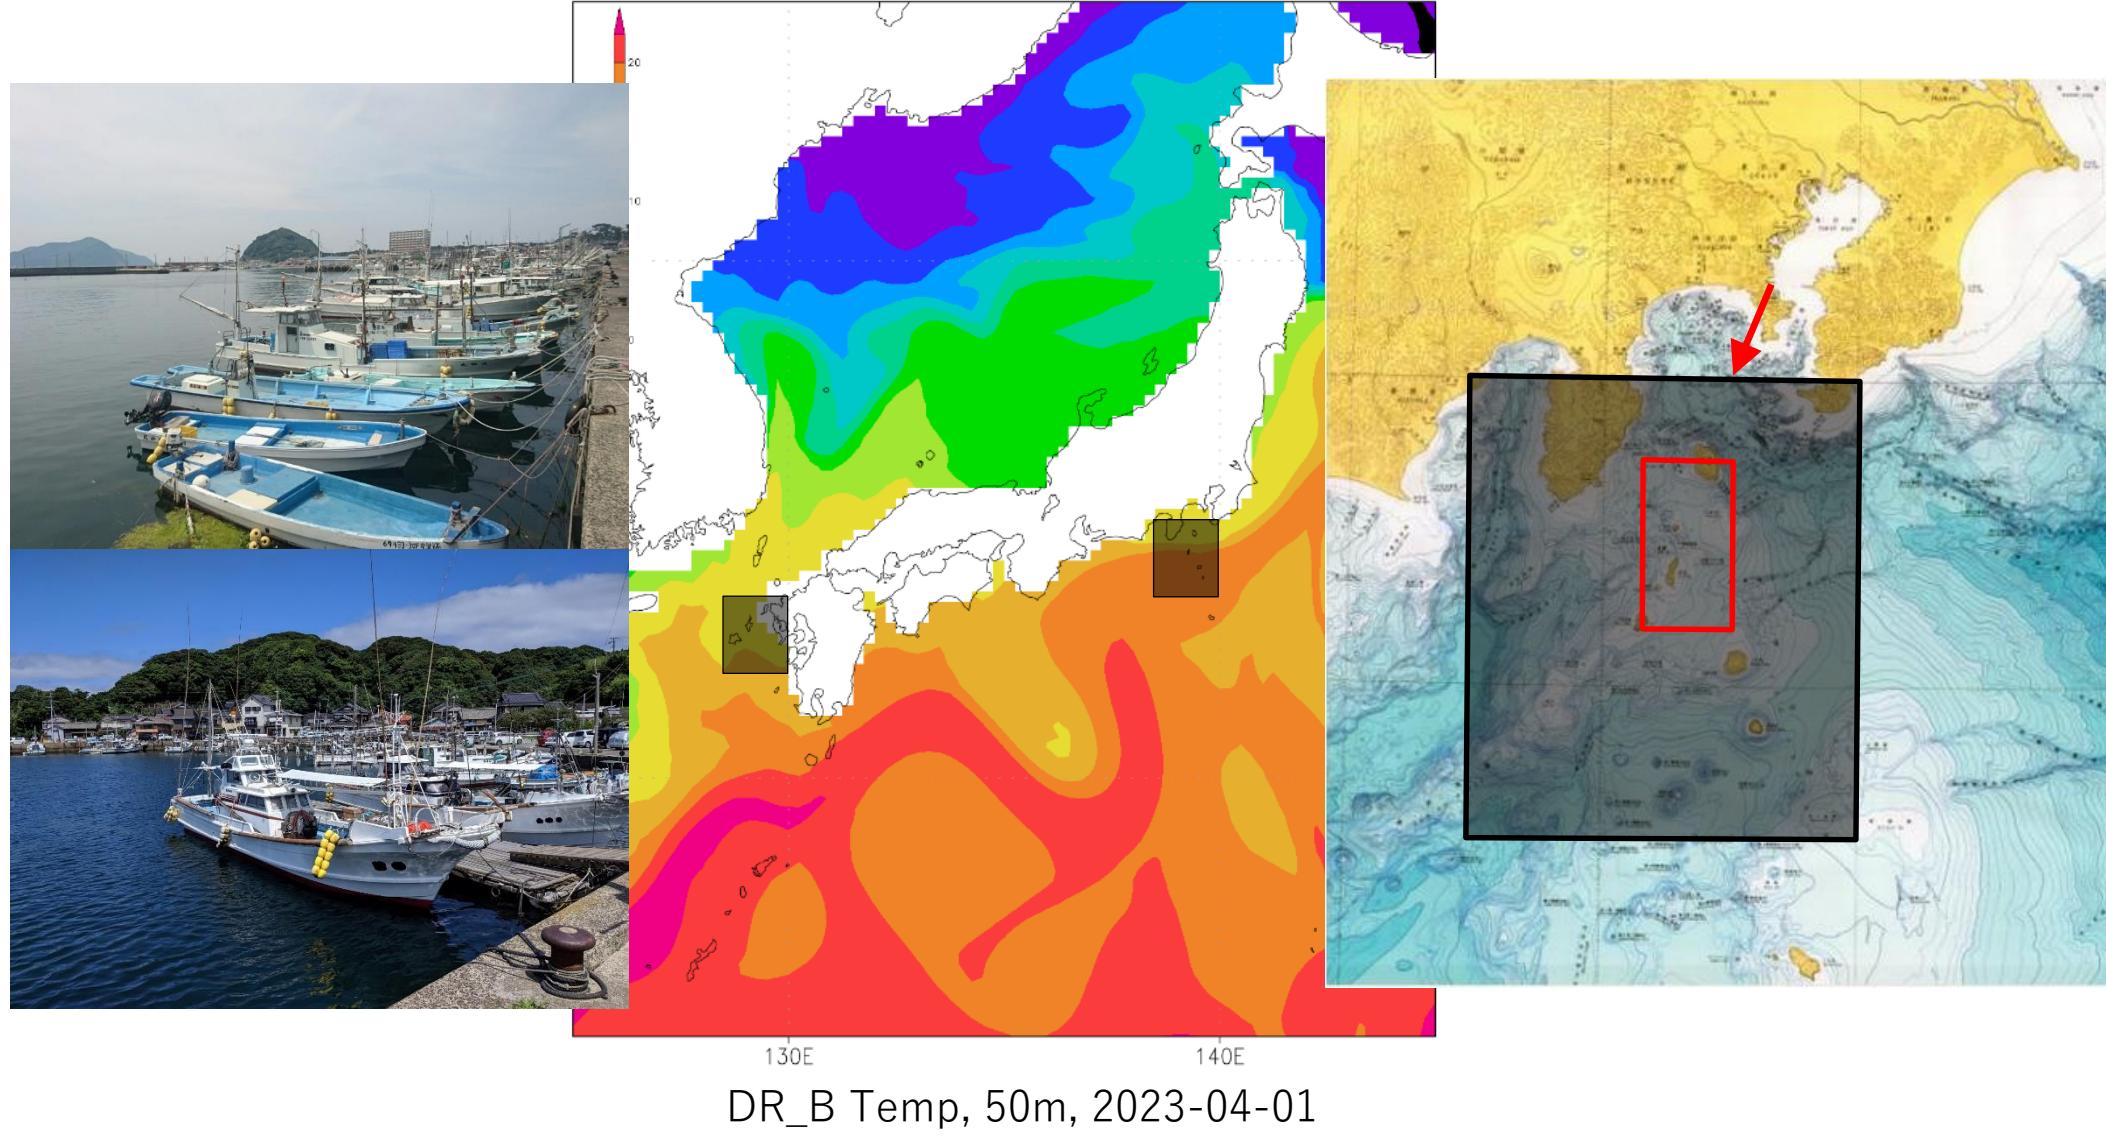

## ❑ Synthesis of 6 systems for better accessibility

- ✓ Start with the intercomparison
- ✓ Experience of multimodel ensemble

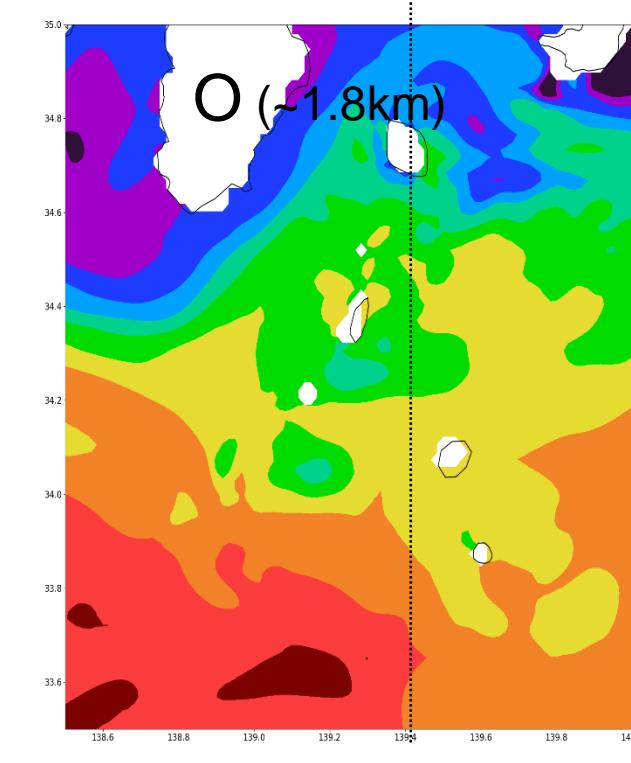

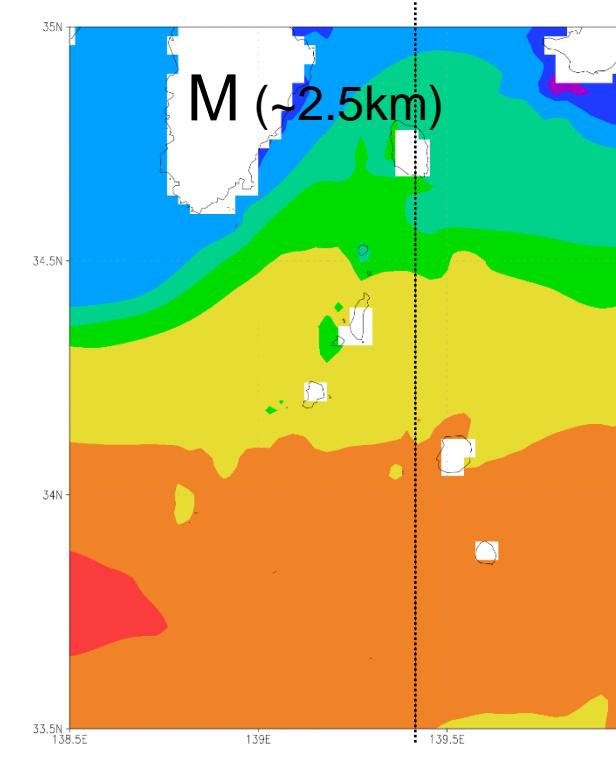

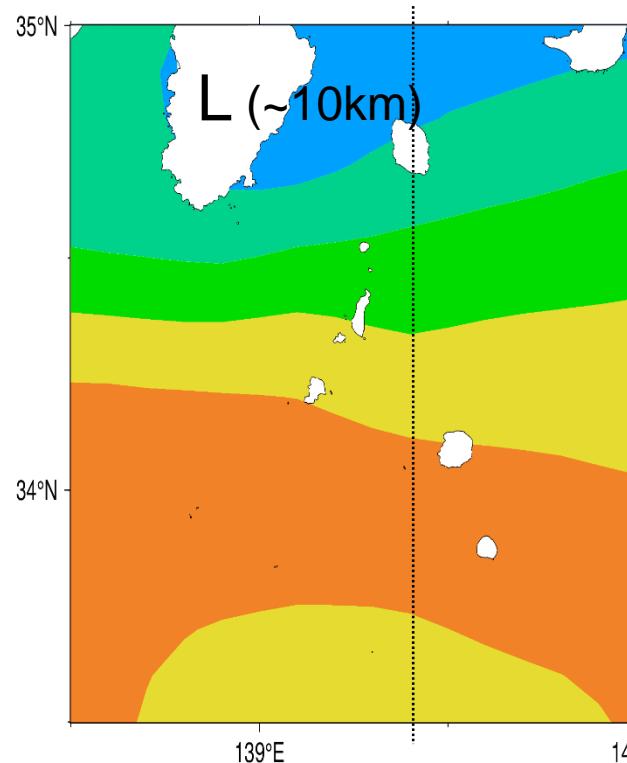

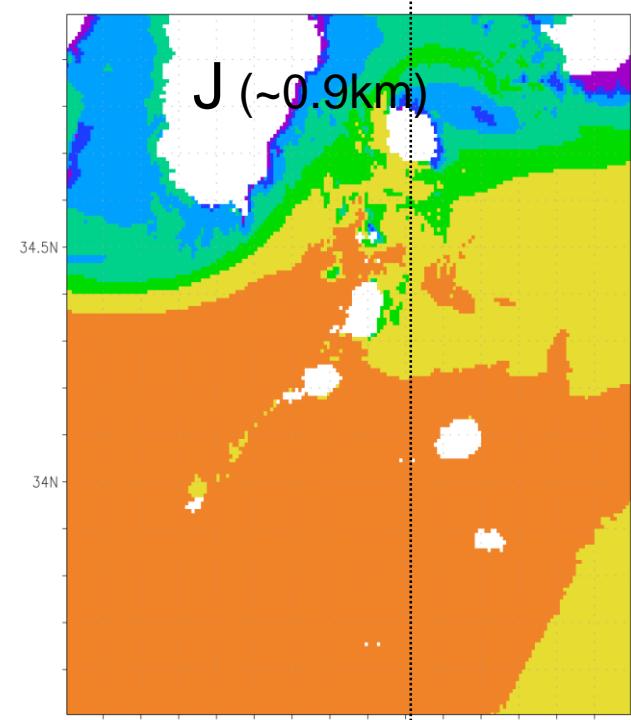

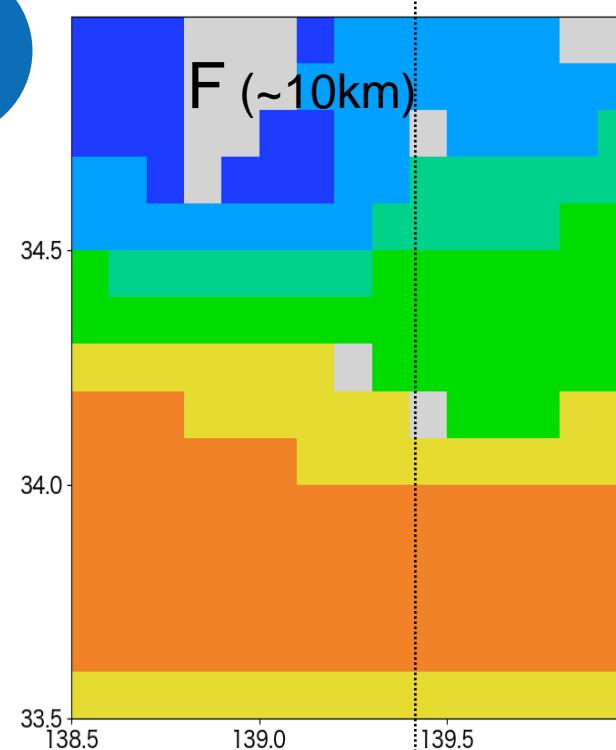

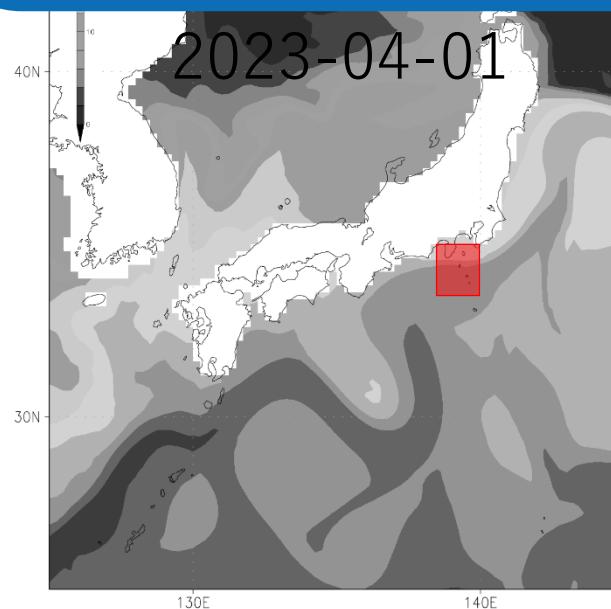

## ❑ Advantage of COSS observation campaign

- ✓ Big research project is under review
  - Lead by JAMSTEC
  - R&D of new instruments
- ✓ Chance of intensive measurement data for COSS DA at the campaign field(s)

# Candidate zones

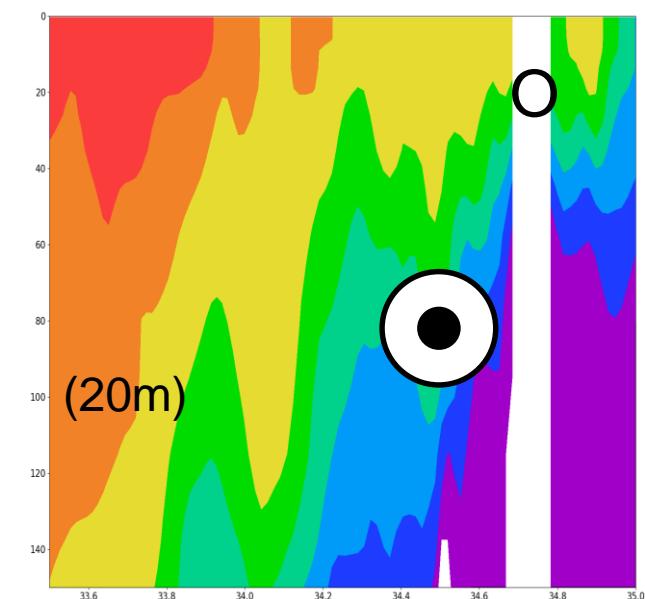

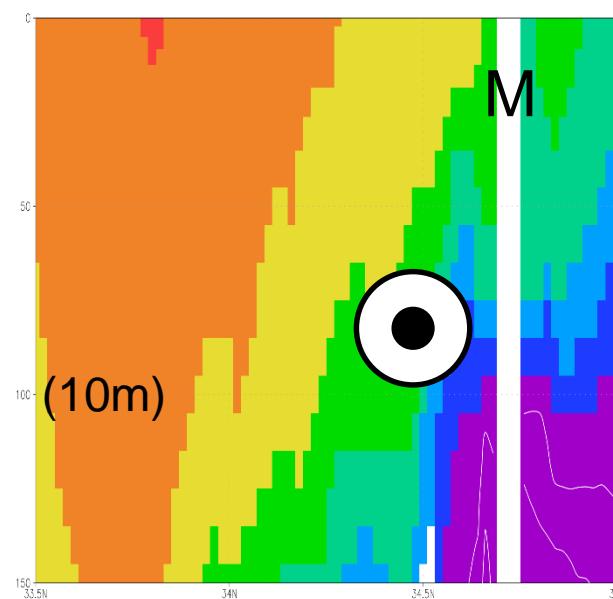

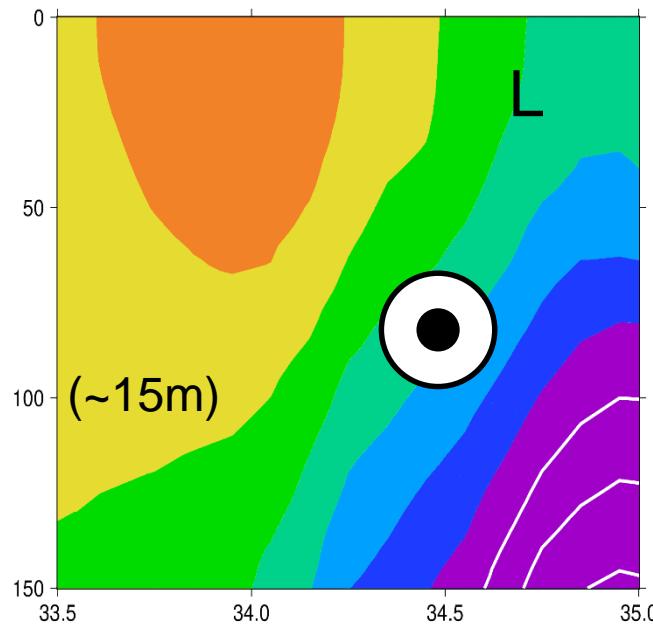

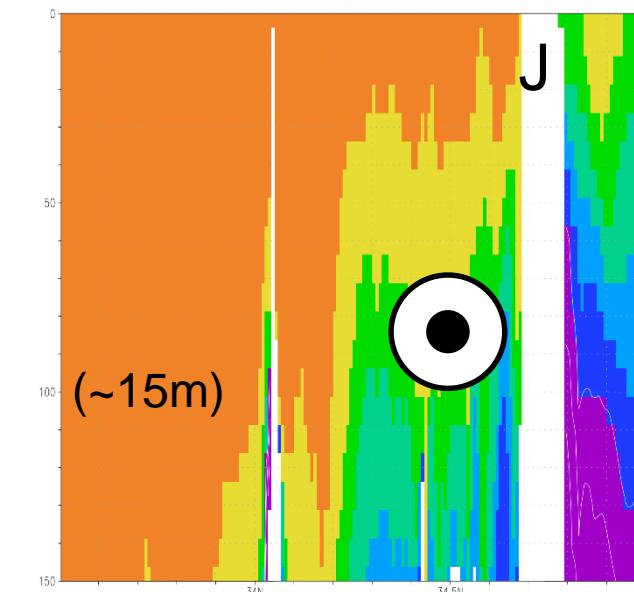

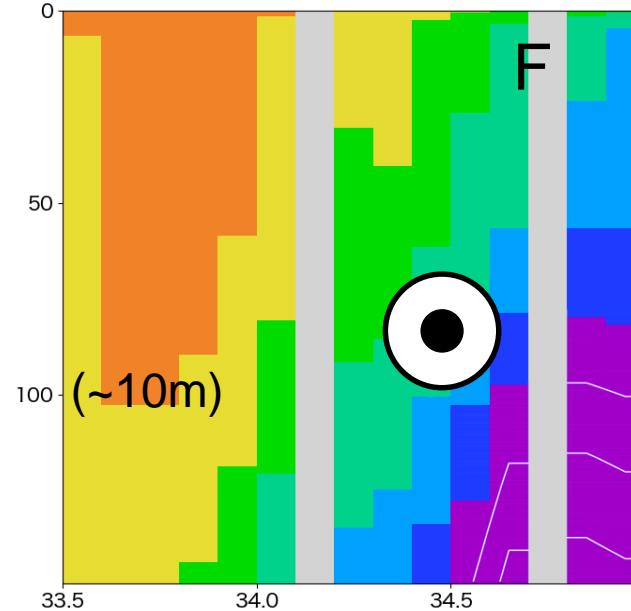

# T 50m

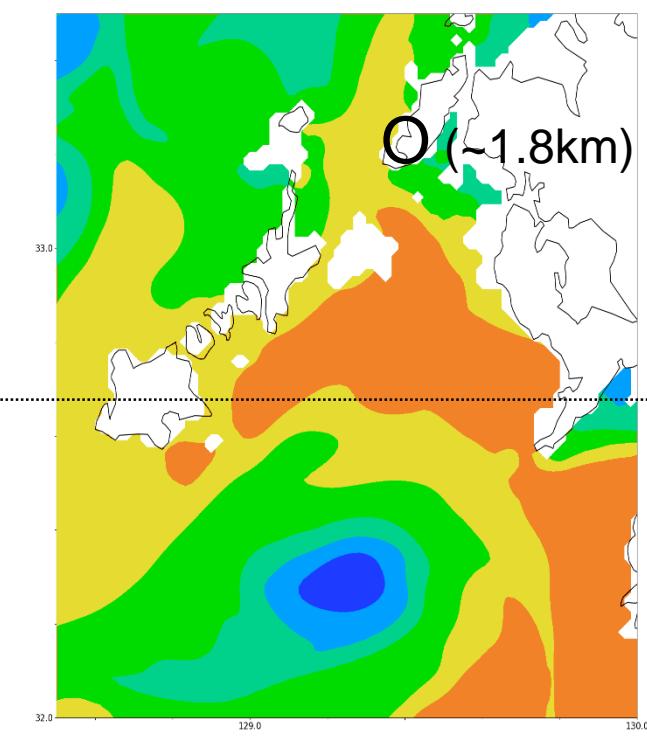

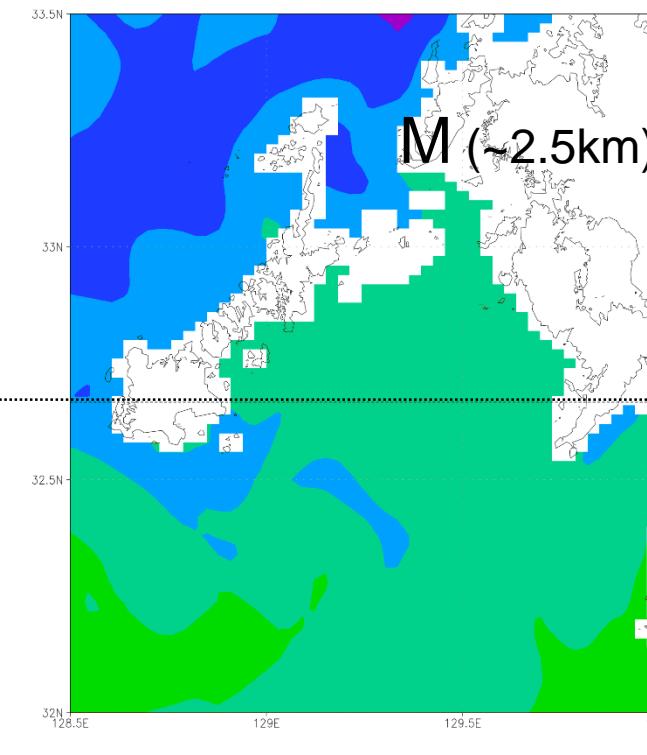

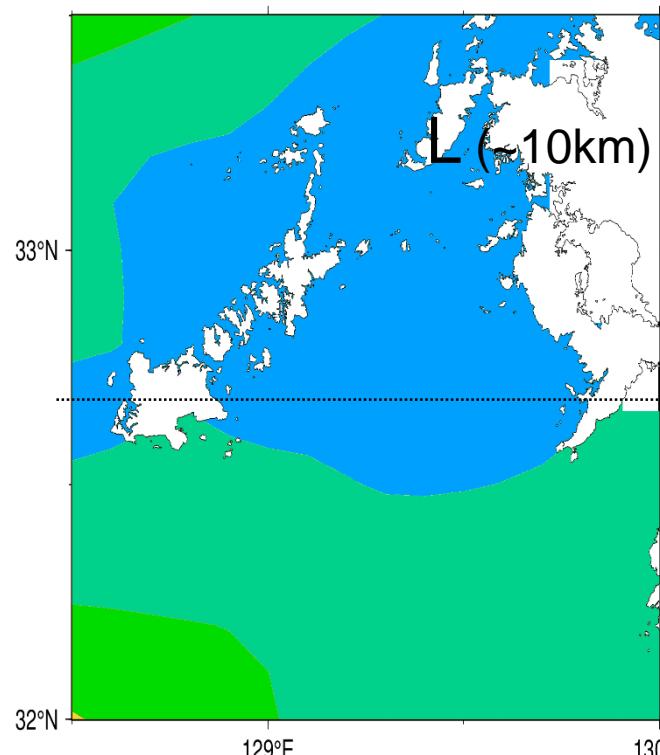

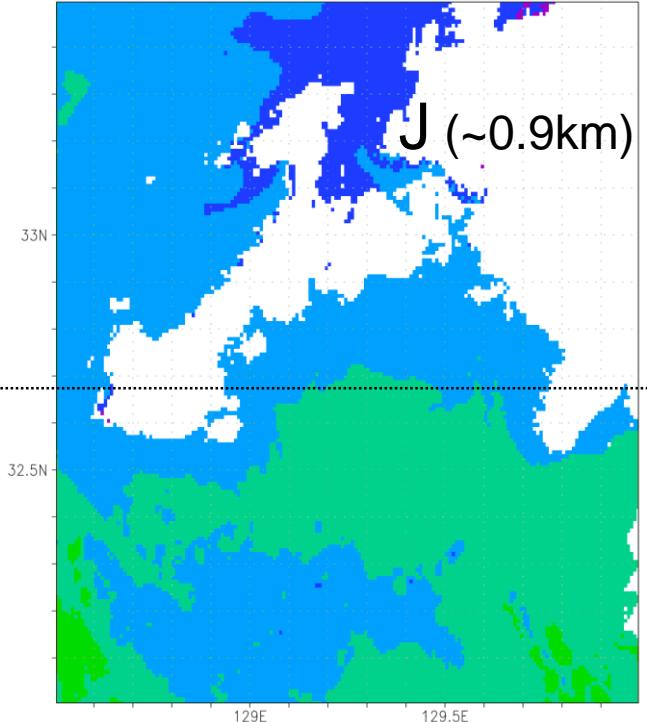

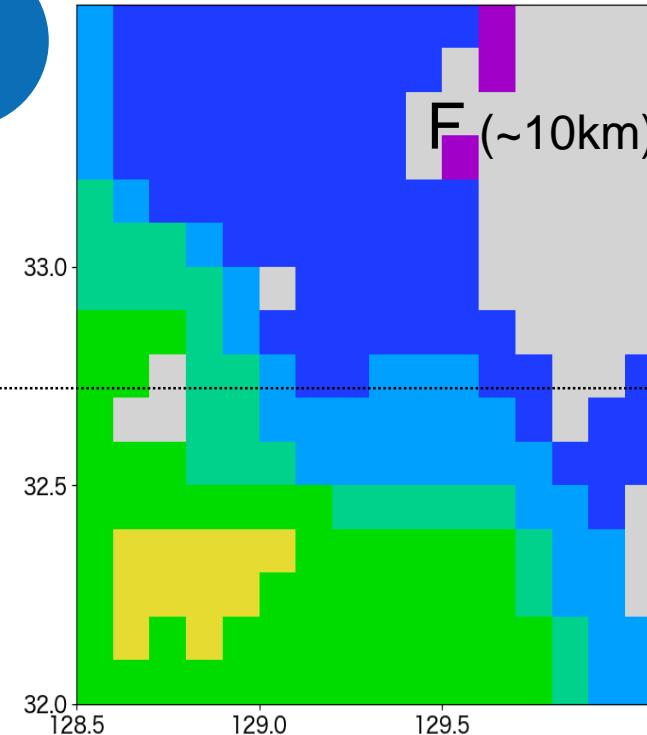

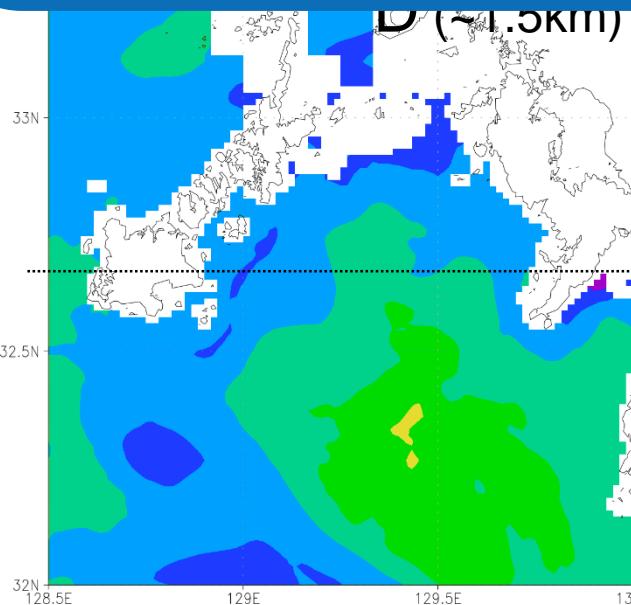

# Temp 139°25'E

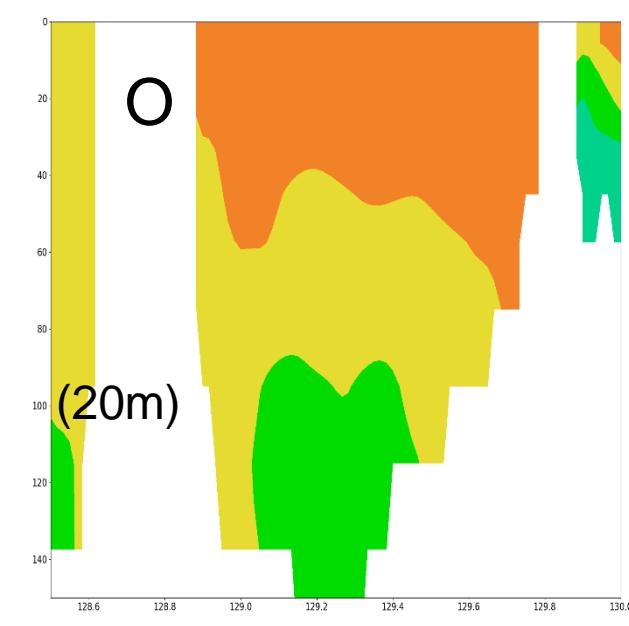

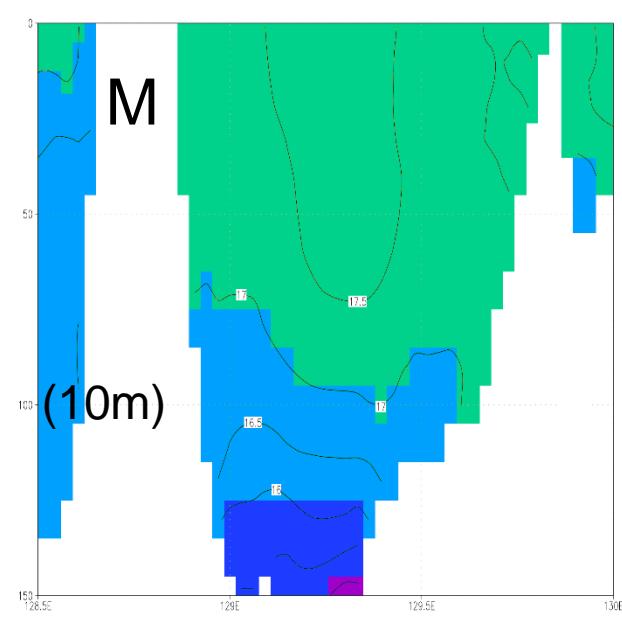

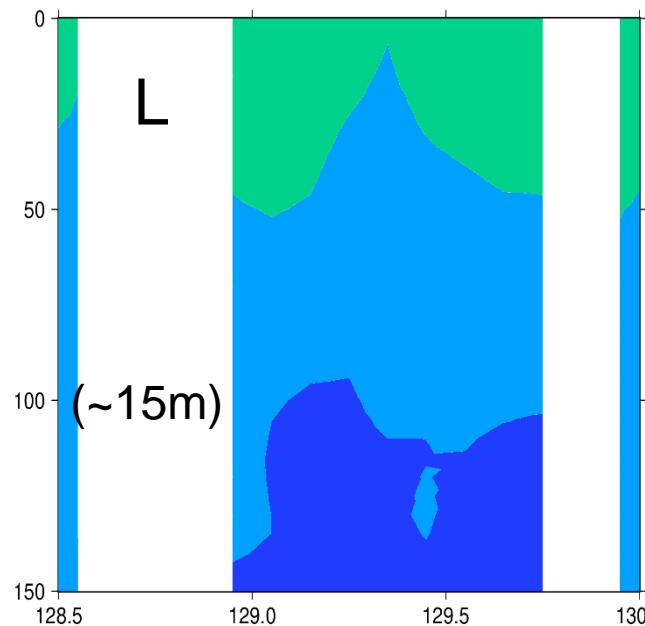

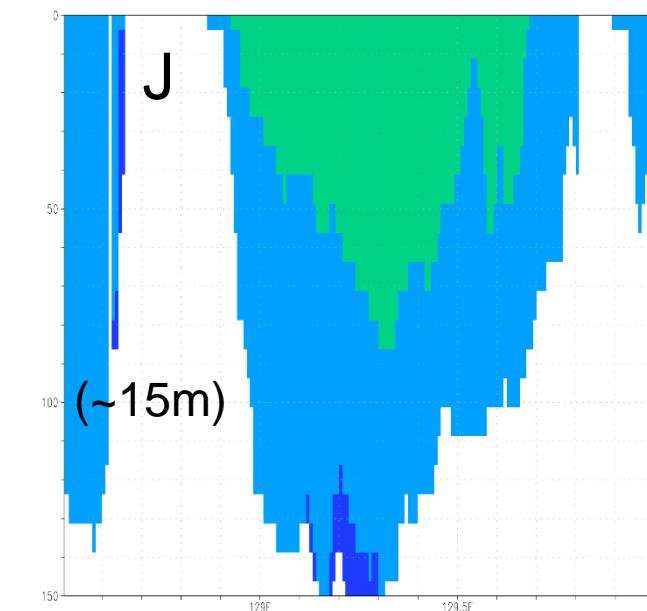

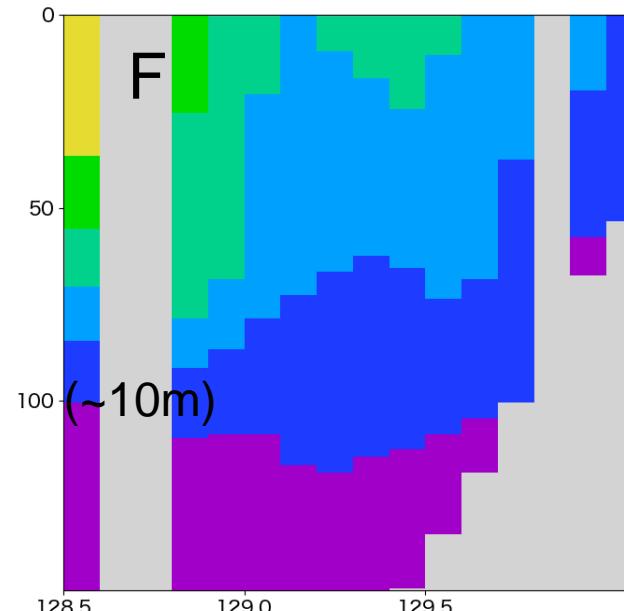

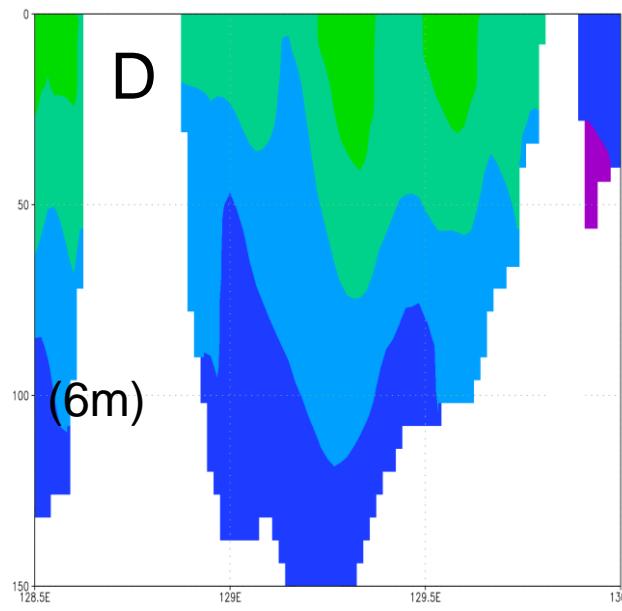

2023-04-01

# T 50m

# Temp 32°40'N

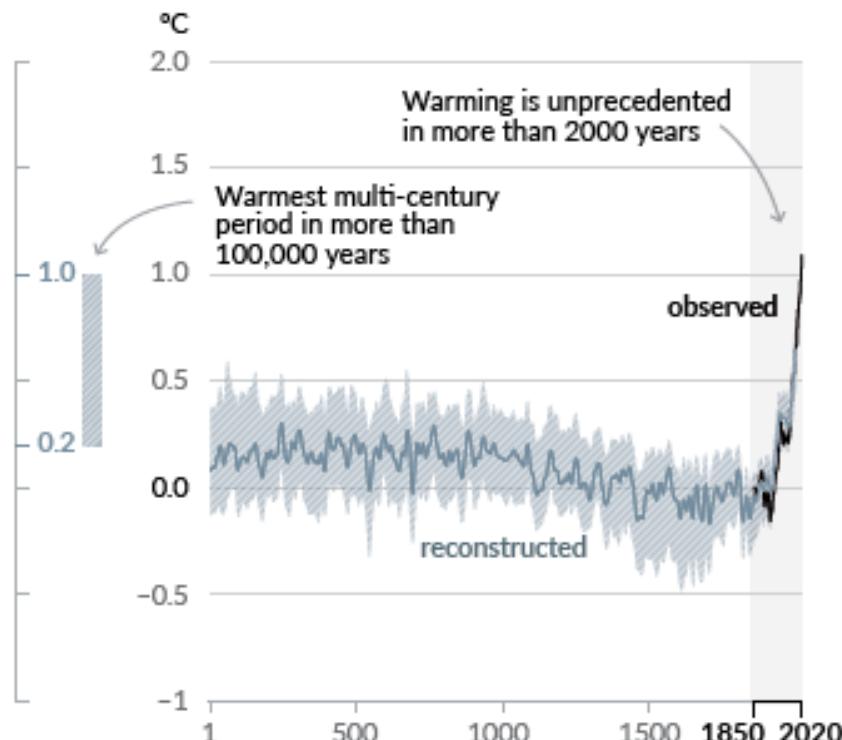

# CMIP Model Ensemble

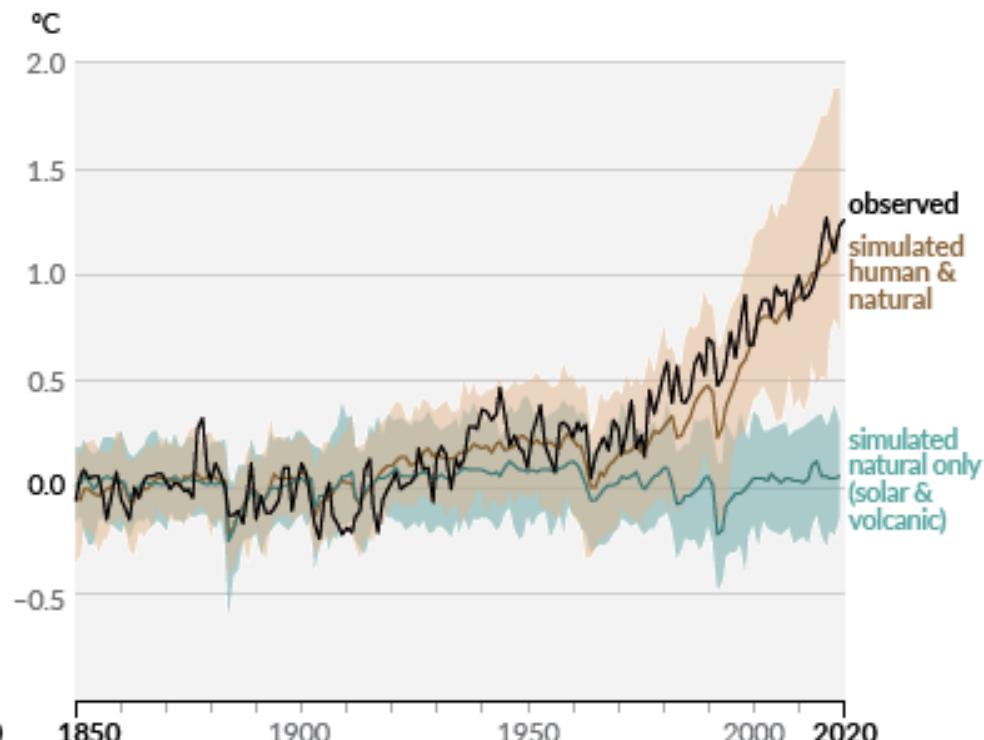

Human influence has warmed the climate at a rate that is unprecedented in at least the last 2000 years

Changes in global surface temperature relative to 1850–1900

(a) Change in global surface temperature (decadal average) as reconstructed (1–2000) and observed (1850–2020)

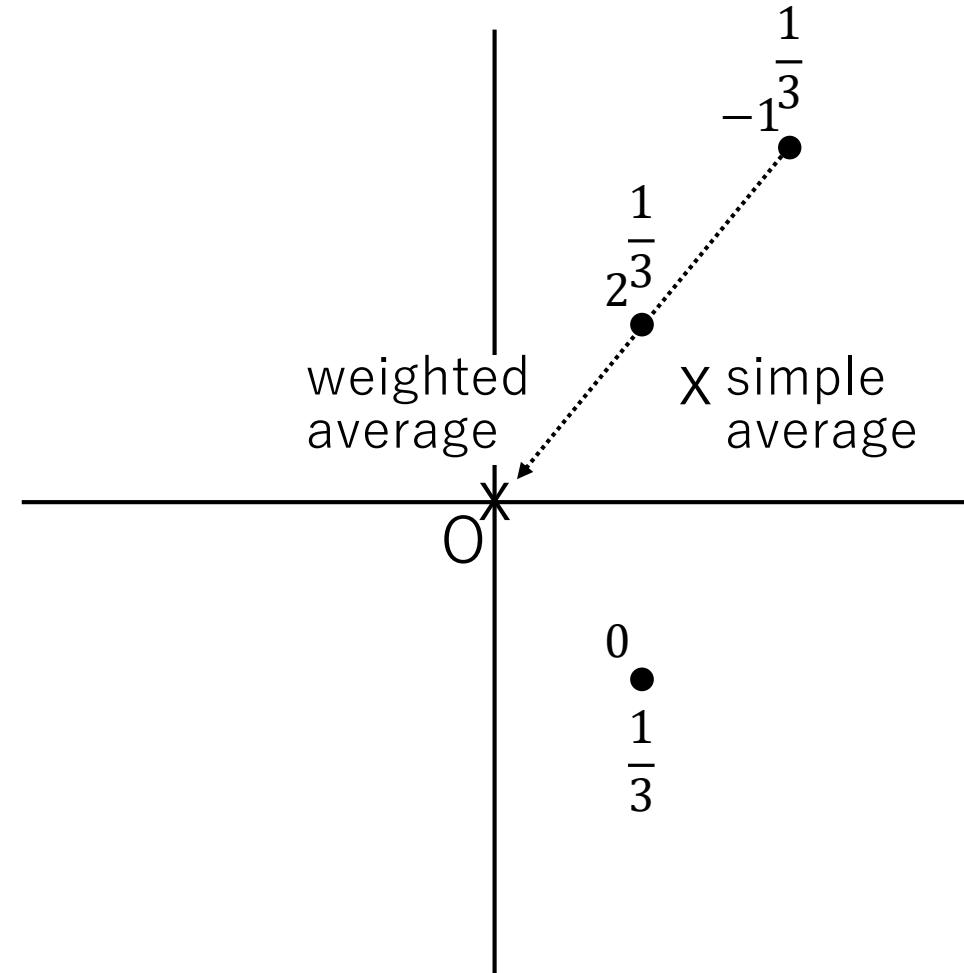

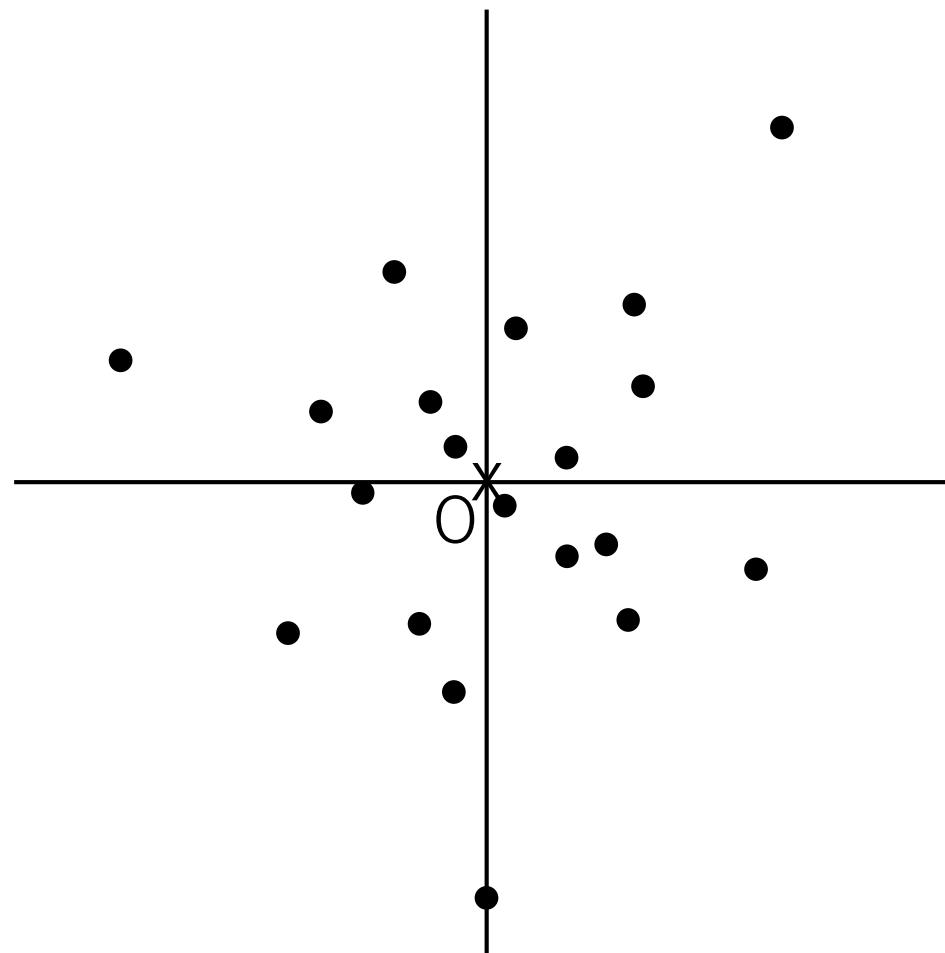

(b) Change in global surface temperature (annual average) as observed and simulated using human & natural and only natural factors (both 1850–2020)

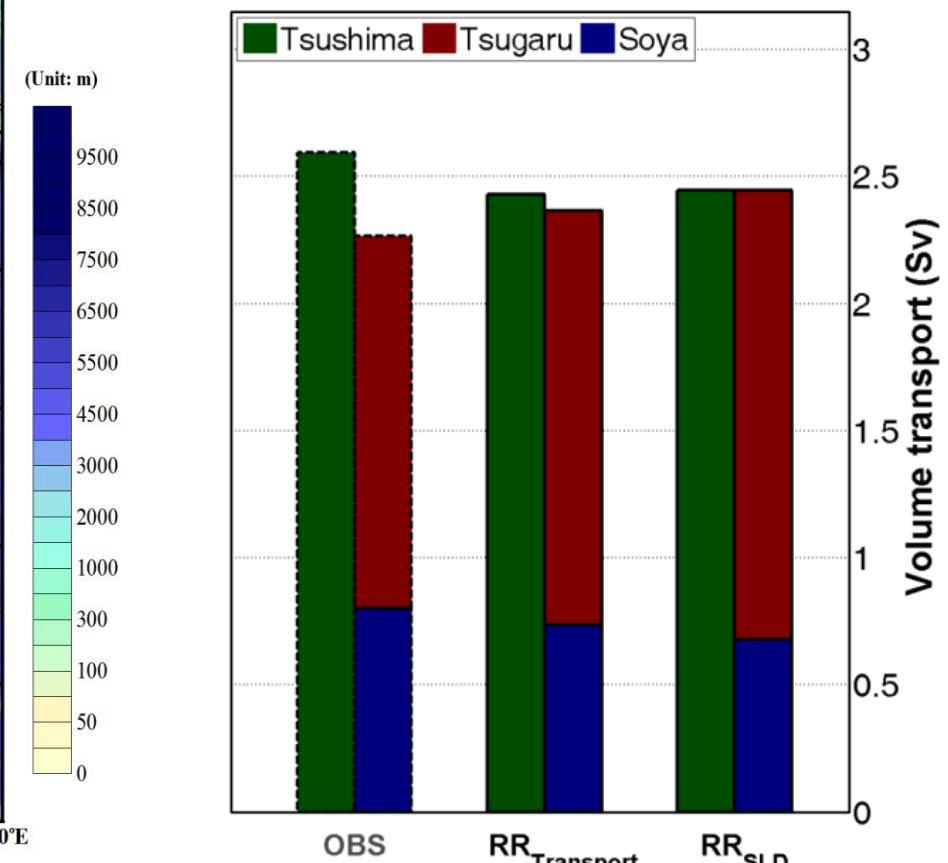

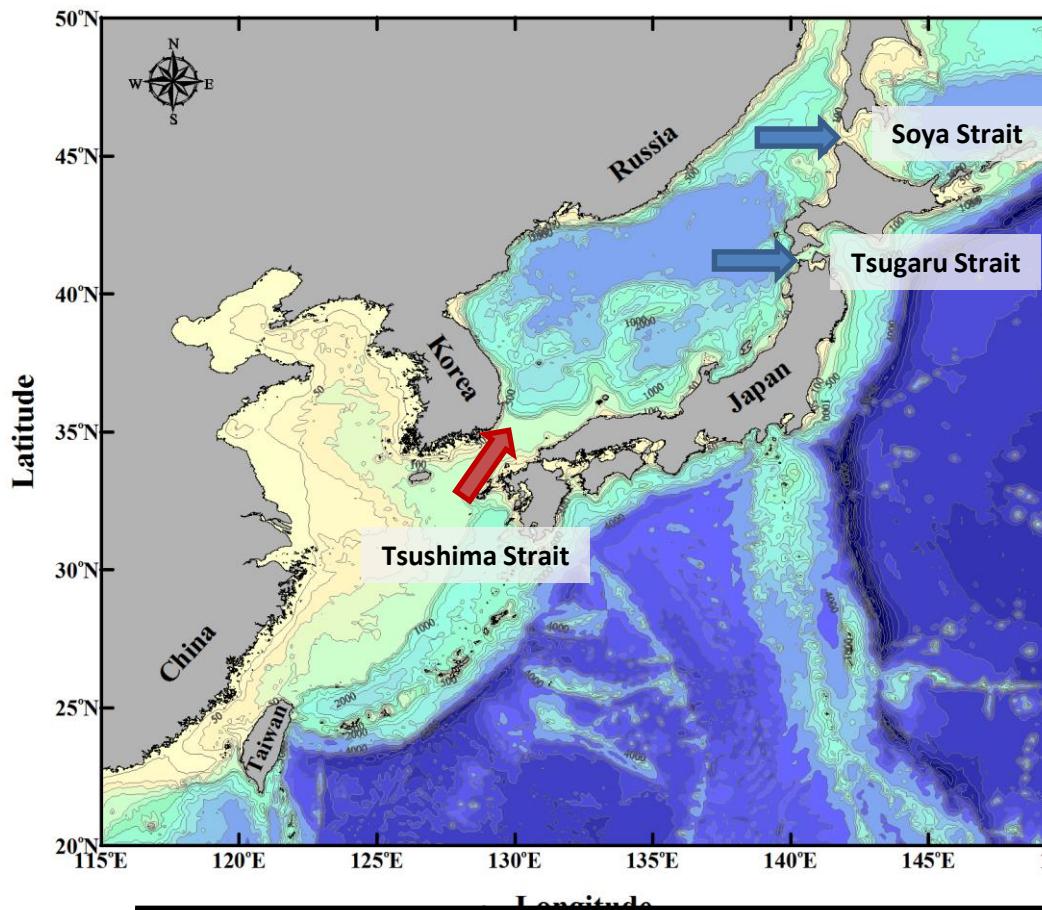

IPCC AR6, Fig.SPM.1

# Simple or Weighted Average

# Regional Ocean MME

Han et al., *Ocean Dyn.* (2016)

$y_i$	$=$	$\beta_0$	$+$	$\beta_1 x_{i,1}$	$+$	$\beta_2 x_{i,2}$	$+$	$\beta_3 x_{i,3}$	$+$	$\beta_4 x_{i,4}$	$\text{TOTAL}$		
<b>MME(RR)</b>				<b>DREAMS</b>		<b>MOVE</b>		<b>JCOPE</b>		<b>HYCOM</b>	$\beta_1 + \beta_2 + \beta_3 + \beta_4$		
$y_{\text{VT}}$	$=$	-0.053	$+$	0.503	$x_1$	$+$	0.503	$x_2$	$-0.352$	$x_3$	$+0.301$	$x_4$	0.954
$y_{\text{SLD}}$	$=$	0.000	$+$	0.069	$x_1$	$+$	0.464	$x_2$	$+0.142$	$x_3$	$+0.228$	$x_4$	0.903

# First 5 years (2023-28)

## ❑ Metrics

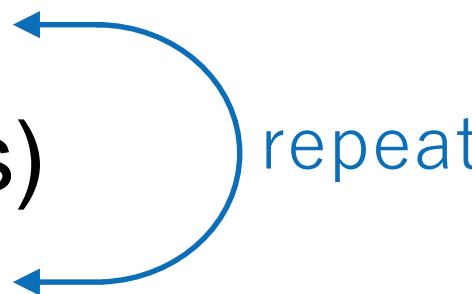

- ✓ Statistics >> Dynamics ?

## ❑ Individual assimilation models

- ✓ Must be improved

## ❑ MME at the target zone(s)

- ✓ Intercomparison
- ✓ Multiscale ensemble average?
  - To overcome the differences in configurations of tide, resolution, topography, ...

# In 10 years

- MME analysis/prediction will be extended from zone to area
- Users (in Japan) straight access to the unified COSS information
  - ✓ Regardless of public or commercial purpose
- Applications expected
  - ✓ Effective fishery and marine food sustainability
  - ✓ Detection and control of marine lives and objects
  - ✓ Contributions to marine renewable energy
  - ✓ ...
